

2011 mentors & mentees

"I am amazed at my mentee's focus on what she wants to achieve in life. She is subtle about it, but her strong determination comes through every time we connect. It has been a pleasure getting to know her. We work well as a team and I hope we can strengthen this partnership going forward."

~2011 mentor

"Mainly, I've made big discoveries about which career paths I do NOT want to pursue. My mentor reassures me that's great even if it feels like not as big of an accomplishment as the discovery of what career I truly DO want."

~2011 mentee

"She works hard on her objectives and goals, but has become more relaxed in her schedule of school and work. She is learning about managing medical bills and other personal business, as well as managing time and resources."

~2011 mentor

"In working with my mentor, I realized I do have self-confidence. I am just a quiet and introverted person. This is who I am!"

~2011 mentee

"One of her goals was to mature. Well, I can and will confidently say that she has matured on so many levels."

~2011 mentor

"The Woman to Woman Mentoring program has made a huge impact on my life. At the beginning of the program, I was struggling with several problems, such as time management and finding my career path. Through meetings with my mentor, I have reached every goal I set for myself!"
